Cybersecurity | IT Infrastructure | Systems Administration

Professional Summary IT professional and Cybersecurity Instructor with hands-on experience in Windows/Linux environments, networking, and threat mitigation. Proven track record in optimizing infrastructure and implementing secure, scalable solutions.

Core Competencies

- **Systems & Cloud Infrastructure:** Windows Server, Linux (LAMP), Active Directory, Microsoft Azure, Hardware Deployment.
- **Networking & Security:** Routing & Switching (Cisco), VLANs/802.1Q, Firewall Administration, Threat Hunting, Least Privilege.
- **Programming & Scripting:** Python (OOP, Automation), Bash Scripting, SPL (Splunk Processing Language).
- **Tools & Protocols:** Splunk (SIEM), Packet Analysis, ARP/DNS/DHCP, RDP, STP/HSRP.

Certifications

- **CompTIA:** CySA+, Security+, Network+, A+
- **Microsoft:** Azure AI Fundamentals, Azure Fundamentals
- **Linux:** Linux Essentials

Professional Experience

MyComputerCareer | Remote

Cybersecurity Instructor | April 2024 – Present

- Delivered instructor-led training in cybersecurity, networking, and cloud fundamentals, mentoring students for CompTIA certifications (A+, Network+, Security+, CySA+).
- Troubleshoot student hardware, operating systems, and virtual lab environments while developing technical documentation and instructional resources.
- Supported remote learners via multi-channel communication to foster an engaging and highly effective technical learning environment.

Murtech Staffing & Solutions | Dallas-Fort Worth, TX

IT Consultant | October 2023 – December 2023

- Executed enterprise-level hardware deployments, rapidly provisioning end-user workstations and network-attached devices across corporate environments.

- Managed physical installation, cable routing, and peripheral connectivity for workstation hubs to ensure optimal system performance.
- Conducted post-installation quality assurance testing to verify baseline connectivity and strict adherence to organizational workspace standards.

Webb Pest Service | Dallas-Fort Worth, TX

Field Service Technician & Branch IT Support | June 2014 – April 2024

- Supported branch network infrastructure, managing Windows workstations, Remote Desktop, antivirus, and firewall administration.
- Maintained operational documentation, successfully resulting in a 45% reduction in work-order inaccuracies and improved efficiency.
- Led daily operations for a 15-person field team, coordinating schedules and actively troubleshooting connectivity issues.

Technical Projects

- **Enterprise SIEM Deployment (Splunk):** Deployed a virtualized Active Directory environment and configured Splunk Universal Forwarders to ingest endpoint telemetry, utilizing custom SPL queries to detect, isolate, and analyze simulated brute-force authentication attacks.
- **Windows Server Security & Administration:** Engineered a secure server baseline by configuring strict Windows Defender firewall rules to drop ICMP sweeps, implementing custom security groups for least privilege access, and validating event log generation.
- **Corporate Network Architecture:** Designed a multi-department VLAN topology configuring IEEE 802.1Q trunking and Inter-VLAN routing; conducted root cause analysis via Layer 2/3 packet captures to resolve persistent ARP resolution bugs and restore IP-to-MAC mappings.
- **Python Interactive Terminal Engine:** Developed a comprehensive object-oriented Python application featuring custom classes, complex control flow, and strict algorithmic input validation to ensure crash-resistant user interactions.
-

Education

- **ITSA:** MyComputerCareer | August 2023 – March 2024 (GPA: 4.0)
- **Security Analyst:** Coursera | June 2023 – August 2023 (Grade: 96%)
